This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

ADVERTISEMENT.

" A Catalogue of any eminent author's Library is likely to be prized by persons familiar with his writings. In the present case, undoubtedly, the nature and extent of the Collection throw light, in a remarkable manner, on the history of its founder. The reader has before him a faithful inventory of the materials with which the National Poet and Novelist had stored his mind before he began his public career; and also very striking indications, both of the zeal with which he watched the progress of literary enterprise down to the close of his life, and of the homage paid to his genius and celebrity by his contemporaries."

To these pertinent and well-expressed remarks of Mr. Lockhart's, on the peculiar species of interest attached to the ABBOTSFORD LIBRARY, the person to whom the charge of preparing this CATALOGUE was entrusted, takes the liberty of adding a few words as to its execution.

The Collection not being formed upon a general plan, embracing all departments of human knowledge, but mainly confined to the two great heads of History and Belles-Lettres, it seemed unnecessary to exhibit its contents in the rigid form of a Catalogue *raisonné*, drawn up on any of the approved systems of bibliographical classification. The arrangement originally made under SIR WALTER SCOTT'S eye, has, therefore, remained unaltered; and the time thereby saved has been employed, it is hoped to greater advantage, in enlarging and perfecting the Index, which it has been the object of the compiler to render as full and comprehensive as possible.

Digitized by Google

The idea of making SIR WALTER SCOTT himself the annotator on the books of his Library, recommended itself the more readily to the compiler, as it seemed to him to form something like a substitute for the projected but abandoned *Reliquiae Trottcosienses*. (See Mr. Lockhart's MEMOIRS, Vol. vii. p. 218.) The references introduced with that view include the notices of every kind, whether reviewals, incidental criticisms and opinions, anecdotes, extracts, &c., which are to be found scattered throughout the voluminous series of his collected WORKS, as well as in the MEMOIRS OF HIS LIFE. Of his own notes the compiler has been sparing, from a desire not to swell the size of the Volume unnecessarily.

All the volumes in which SIR WALTER had written manuscript notes have been carefully particularized. But of these notes very few have been extracted, as most of them possessing any literary or personal interest were found to be either already appropriated, (in substance at least) by himself, or inserted, *verbatim*, in the interesting pages of his biographer.

In conclusion, the compiler hopes to receive that indulgence for whatever errors he may have committed, which those best acquainted with the nature of such undertakings are always the readiest to bestow.

J. G. COCHRANE.

EDINBURGH, *24th November*, 1838.
